

# How to Clean Batch Brewers

## What to Use

Tabz

or

Pakz

## Dosing

- Tabz is available in several sizes. The '61' tablets weigh 4.0 grams and are 20.0 mm in diameter, while the '95' tablets weigh 12.0 grams and are 28.8 mm in diameter. Use 1 '61' tablet for every 0.5 gallons of brewer capacity or 1 '95' tablet for every 1.5 gallons of brewer capacity.
- Pakz is available in a single sized filter packet, which can make up to 1.5 gallons of cleaning solution.

**WARNING**  
**HOT**  
**LIQUID**

## **STEP 1**

Discard all coffee from the server.

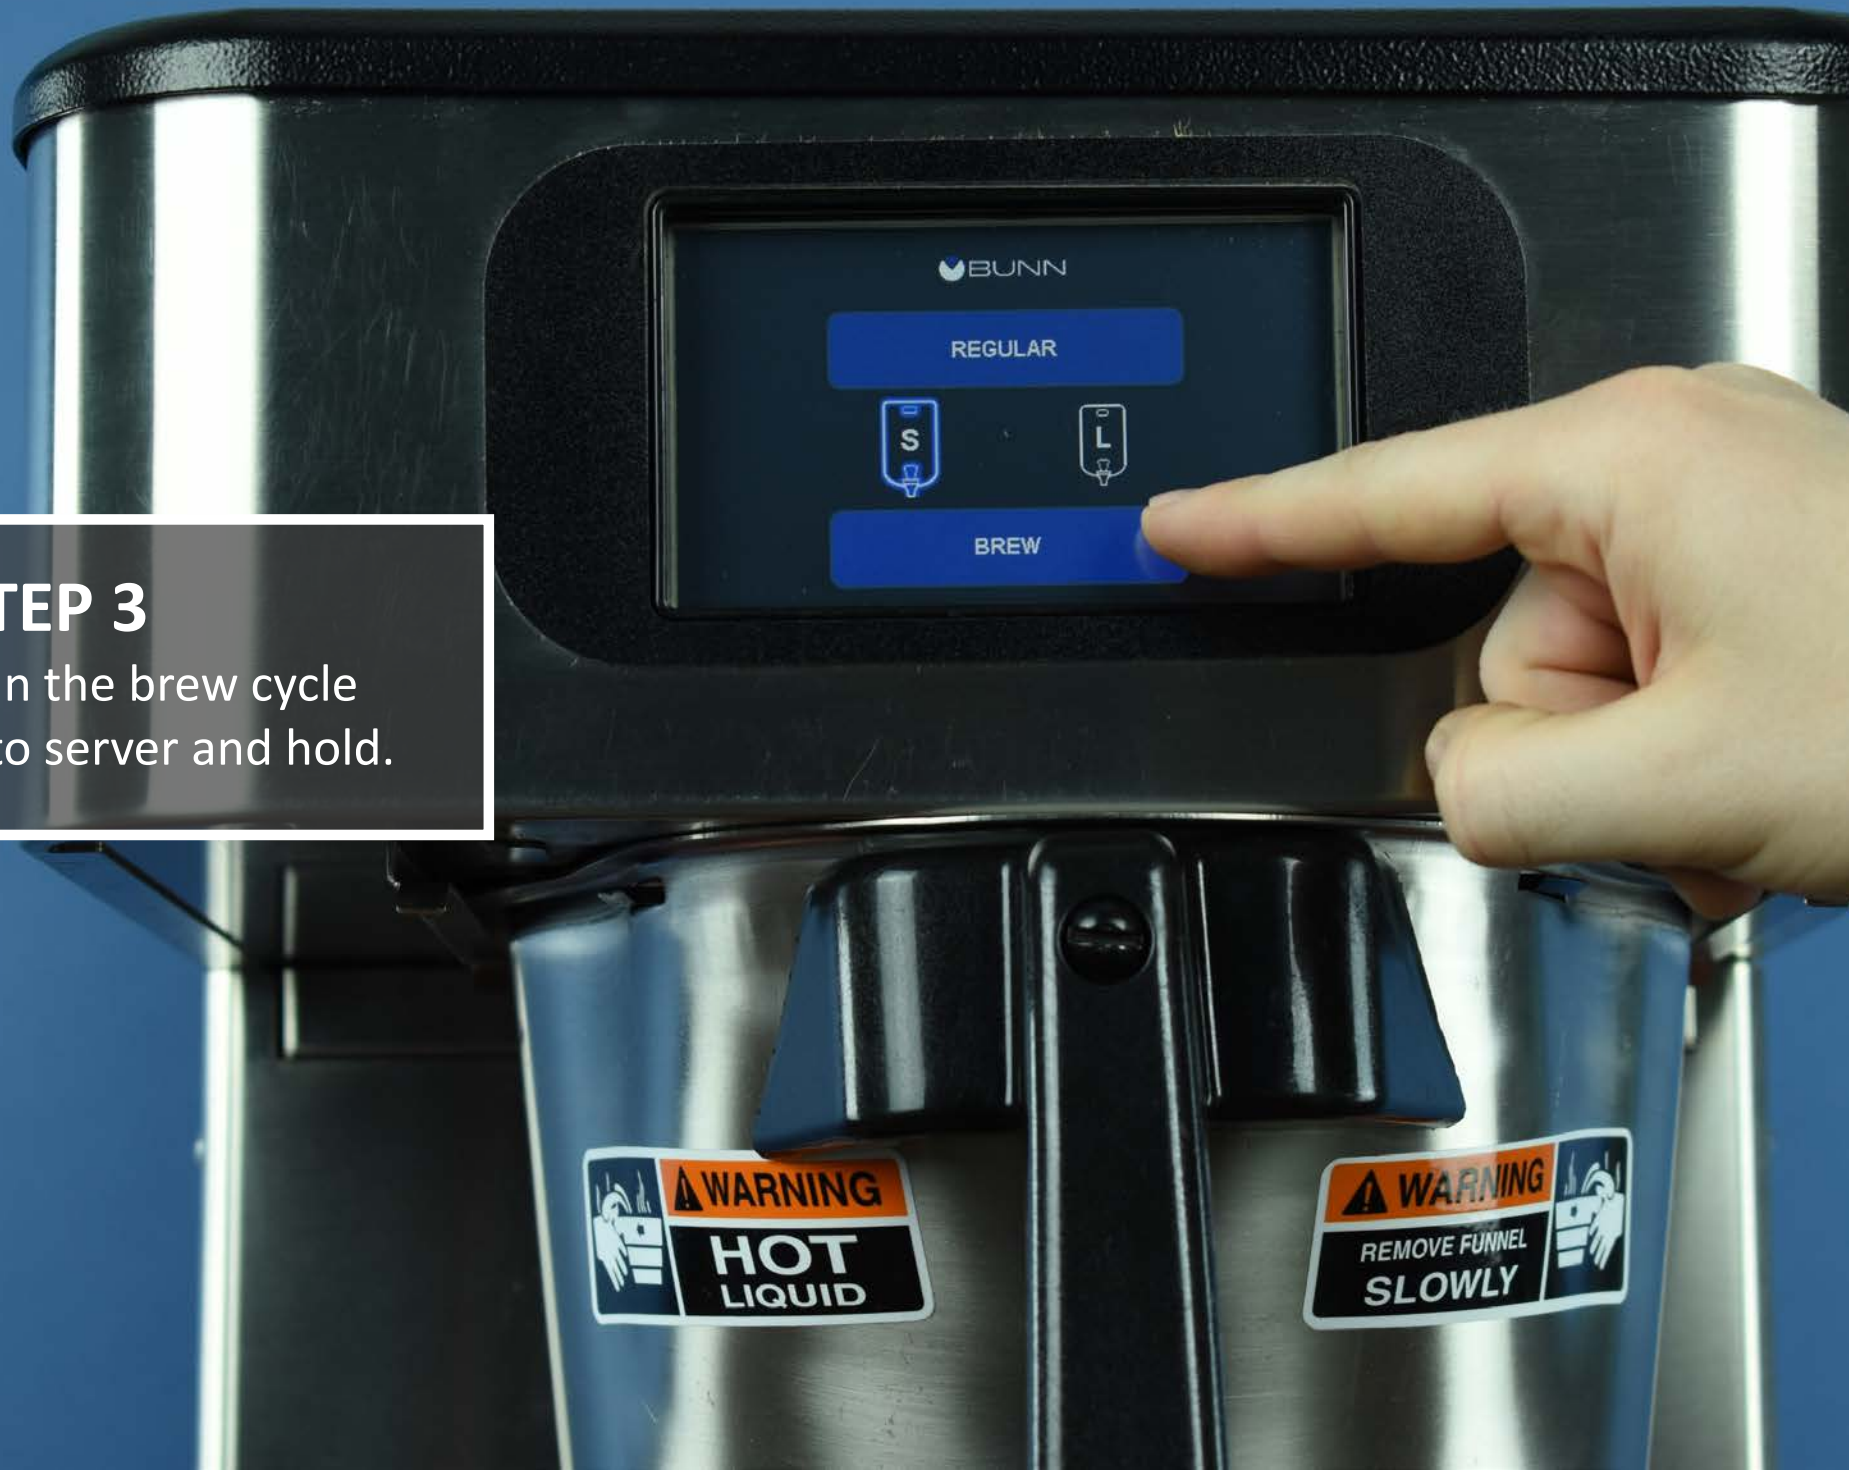

## STEP 2

Place the cleaning product in the center of the brew basket. Dose appropriately for the size of the brewing vessel.

### STEP 3

Run the brew cycle into server and hold.

## STEP 4

Discard the solution and use a coffee brush to remove any remaining residue or stains. Rinse thoroughly with clean water to ensure no cleaning solution remains.
